

CALNET Customer Security Alert!

SBC, our CALNET contractor, notified the DGS-TD office of the following activity.

Someone claiming to be an SBC representative for the CALNET MSA called into one of the data centers while attempting to get information about the network and systems. Fortunately the State employee, who answered, questioned the authority of the caller, refused to provide information, and then notified SBC.

Information about the State's internal networks and data systems should not be shared with unauthorized persons. This information could be used to harm or compromise vital State data networks and systems.

Please be sure that anyone calling for this kind of information is authorized to receive it. Take their name and telephone number and call your local CALNET contract representative to make sure the caller is authorized to receive the requested information.
